ABOUT ME

Iamaskilled Full-Stack Web Developer with expertise in React, Next.js, and Node.js, passionate about creating efficient and user-focused applications. I've delivered successful projects like e-commerce platforms and optimized backend performance by 40%. My goal is to build innovative solutions and grow as a developer.

SKILLS

Frontend : React.js, Next.js, Tailwind, Redux

Backend: Node.js, Express.js, Passport.js

Tools: Git/Github, VS Code, Postman, npm/yarrn, Vercel

Soft skills : Communication, Team management, problem solving

PROJECTS

- **FOOD COLLECTION**   Live Demo   Client Repo   Server Repo

  The Food Order website is designed to manage and browse food donations. Users can update or delete their food items while administrators can monitor the items available for donation. This system is ideal for facilitating food redistribution and minimizing waste.

  Technology : React, Node, Redux, Express, MongoDB

- **MOVIE PORTAL**   Live Demo   Client Repo   Server Repo

  Created a secure and user-friendly movie management website with features like add, delete, sort, and search for easy organization. Designed a responsive interface and prioritized functionality for a smooth user experience.

  Technology : React, Tailwind, Node, Redux, Express, MongoDB
